**Re: Harvest Management Plan – Porcupine Caribou Management Board (PCMB)  
Recommendations**

The Gwich'in Tribal Council (GTC) has reviewed the PCMB Annual Harvest Meeting Recommendations to the Parties report of February 2014 and agree with the recommendations made by the PCMB that the Porcupine caribou herd be considered in the Green Zone (above 115,000 caribou) as per the Harvest Management Plan.

The GTC will continue to promote the management actions consistent with the Green Zone including but not limited to:

- Harvest only the amount required;
- Licensed hunters receive a maximum of two bull tags;
- Shooting will be accurate and retrieval of wounded animals; and
- Continue to assist in the collection of rigorous and verifiable harvest data.
