

Suggested Outline for the Porcupine Caribou Annual Harvest Meeting Submissions

Suggestions for Stakeholders/Individuals to provide information regarding the following:

Population Trend

- Number of caribou seen compared to number normally seen
- Number of calves seen last spring and this fall

Harvest

- Additional fall harvest data from June 1 to meeting
 - actual reported and estimated numbers or just a summary of harvest for that time
 - include if possible bull/cow ratios

Caribou Body Condition

- Information from questions asked about caribou condition and availability during door-to-door surveys
- Information reported by other means
- Abnormalities seen?

Habitat

- Observed effects of development on caribou
- Fires: intensity, locations relative to caribou habitat
- Snow depths: are they low, normal, or extreme so far this year?
- Extreme weather events
 - e.g. icing events last spring or this fall in your area?

Communication efforts with respect to HMP and AHM

- How well is the word getting out? best methods, suggestions
- Some information is collected by door-to-door survey in some communities

Challenges and/or successes

Other Information (e.g. traditional or local information)

Conclusions/Advice to the PCMB
